

Skyworks Powers Next Generation 4G/5G Mobile Hotspots

January 9, 2019

Delivering Unparalleled Connectivity Experiences

LAS VEGAS--([BUSINESS WIRE](#))--Skyworks Solutions, Inc. (NASDAQ: SWKS), an innovator of high performance analog semiconductors connecting people, places and things, today announced that its SkyOne® Ultra 3.0 portfolio is being leveraged by Inseego (NASDAQ: INSG), a pioneer in 5G and intelligent IoT device-to-cloud solutions, for their next generation mobile hotspot. Given the significant growth in mobile subscribers and densification of data traffic – which will intensify with 5G – demand for portable, reliable, anytime connectivity is rapidly increasing. Skyworks' compact, highly-integrated front-end system is being utilized in combination with Qualcomm's LTE X20 modem to power Inseego's MiFi 8800L device, the industry's first commercially available gigabit LTE platform for Cat 18. The complete, global solution covers more than 23 bands and provides ultra-fast user experiences with enterprise-grade security.

"Leveraging decades of expertise, Skyworks' innovative cellular solutions are enabling a growing number of diverse applications," said Carlos Bori, senior vice president of sales and marketing for Skyworks. "Mobile hotspots and IoT enterprise devices represent yet another burgeoning market where Skyworks' advanced wireless architectures are facilitating broad coverage and premium performance."

"As we accelerate towards 5G, Skyworks is the ideal partner to provide next level performance across consumer, enterprise and IoT use cases," said Ashish Sharma, chief marketing officer and executive vice president of IoT and mobile solutions for Inseego. "Skyworks' leading wireless engines seamlessly interface with our robust technologies to deliver unprecedented LTE speeds and highly-reliable connections in dense traffic areas, a forerunner to what 5G networks will offer."

According to Zion Market Research, the mobile hotspot router market is expected to increase from approximately \$2 billion in 2017 to more than \$7 billion by 2024, a compound annual growth rate of 20 percent.¹

About Skyworks' SkyOne Ultra 3.0 Portfolio

The SkyOne® Ultra 3.0 family utilizes Skyworks' SkyBlue™ enabling technology to deliver the strict performance and efficiency requirements for today's Internet of Things (IoT) applications. The highly-integrated architectures incorporate all of the power amplification, integrated filtering, antenna switching and diversity receive functionality in an extremely compact package, facilitating seamless deployment of cellular connectivity across a wide range of IoT products. Solutions include:

- [SKY78130-13](#) – Low band 3G/4G SkyOne® Ultra 3.0 module
- [SKY78131-13](#) – Mid band 3G/4G SkyOne® Ultra 3.0 module
- [SKY78132-21](#) – High band 3G/4G SkyOne® Ultra 3.0 module
- [SKY87021-11](#) – RF front-end power management IC
- [SKY13716-11](#) – Low band, low noise amplifier (LNA) diversity receive module
- [SKY13751-11](#) – Mid-high band/Ultra-high band LNA diversity receive module
- [SKY13719-11](#) – Mid/High/Ultra-high band LNA MIMO receive module
- [SKY77794-12](#) – Band 42 power amplifier with SkyBlue™

About Skyworks

Skyworks Solutions, Inc. is empowering the wireless networking revolution. Our highly innovative analog semiconductors are connecting people, places and things spanning a number of new and previously unimagined applications within the aerospace, automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearable markets.

Skyworks is a global company with engineering, marketing, operations, sales and support facilities located throughout Asia, Europe and North America and is a member of the S&P 500® and Nasdaq-100® market indices (NASDAQ: SWKS). For more information, please visit Skyworks' website at: www.skyworksinc.com.

Safe Harbor Statement

Any forward-looking statements contained in this press release are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. Forward-looking statements include without limitation information relating to future events, results and expectations of Skyworks. Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will" or "continue," and similar expressions and variations (or negatives) of these words. Actual events and/or results may differ materially and adversely from such forward-looking statements as a result of certain risks and uncertainties including, but not limited to, our

ability to timely and accurately predict market requirements and evolving industry standards and to identify opportunities in new markets; our ability to develop, manufacture, and market innovative products and avoid product obsolescence; our ability to compete in the marketplace and achieve market acceptance of our products; the availability and pricing of third-party semiconductor foundry, assembly and test capacity, raw materials and supplier components; the quality of our products; and other risks and uncertainties identified in the "Risk Factors" section of Skyworks' most recent Annual Report on Form 10-K (and/or Quarterly Report on Form 10-Q) as filed with the Securities and Exchange Commission ("SEC"). Copies of Skyworks' SEC filings can be obtained, free of charge, on Skyworks' website (www.skyworksinc.com) or at the SEC's website (www.sec.gov). Any forward-looking statements contained in this press release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
