

# **Skyworks Enables Next Generation Tracking Devices**

### Wireless Solutions Optimize Battery Life and Extend Range

IRVINE, Calif.--(BUSINESS WIRE)-- Skyworks Solutions, Inc. (NASDAQ: SWKS), an innovator of high performance analog semiconductors connecting people, places and things, today announced that its connectivity solutions are enabling next generation tracking devices, a new and exciting Internet of Things application. Specifically, Skyworks' high efficiency, frontend systems have been adopted by XY Findables, a market leader in nearable technology, to increase battery life and nearly double the range when compared to other personal item finders.

"By leveraging Skyworks' fully integrated solutions, we were able to accelerate the introduction of the most powerful Bluetooth<sup>®</sup> item finder available today," said Arie Trouw, chief executive officer of XY. "XY4+'s platform radically improves performance and extends battery life up to five years, supporting our goal of providing consumers both peace of mind and assistance when locating their most valuable items."

"Advancing Bluetooth<sup>®</sup> wireless performance in premium products like XY4+ demonstrates our commitment to pioneering breakthrough technologies and addressing demand for connectivity across a broad array of IoT applications," said John O'Neill, vice president of product marketing for Skyworks. "As part of our ambitious vision to connect everyone and everything all the time, we are delighted to partner with innovative companies like XY Findables to offer our system-level expertise and broad product portfolio."

According to XY, the average person spends approximately five hours a month searching for misplaced items like TV remotes, keys, smartphones, eyewear, wallets and purses. In a recent report from the European Global Navigation Satellite Systems Agency, personal tracking devices are expected to become the fastest growing market within the Location Based Services (LBS) sector with an expected compounded annual growth rate of 18 percent between 2016 and 2025.

## About Skyworks' Front-end Connectivity Solutions

XY4+ item finders utilize Skyworks' highly integrated front-end modules designed for Bluetooth<sup>®</sup> Low Energy (BLE) range extension devices operating in the 2.4 to 2.485 GHz range. Applications include wearables, beacons, sensors, home automation and other IoT platforms.

## About XY Findables

XY | The Findables Company launched the first generation of its flagship product, the XY Finder, on Kickstarter in 2014. XY Finders are Bluetooth LE-powered units that, when synced to the XY Find It mobile app, allow users to keep tabs on their valuable property. Currently, XY Finders are available online at <u>XYFindIt.com</u> and <u>Amazon.com</u> as well as in brick and mortar stores across the country. For more information on XY Findables visit: <u>https://www.xyfindables.com/</u>.

#### **About Skyworks**

Skyworks Solutions, Inc. is empowering the wireless networking revolution. Our highly innovative analog semiconductors are connecting people, places and things spanning a number of new and previously unimagined applications within the automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearable markets.

Skyworks is a global company with engineering, marketing, operations, sales and support facilities located throughout Asia, Europe and North America and is a member of the S&P 500® and Nasdaq-100® market indices (NASDAQ: SWKS). For more information, please visit Skyworks' website at: <u>www.skyworksinc.com</u>.

#### Safe Harbor Statement

Any forward-looking statements contained in this press release are intended to gualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. Forward-looking statements include without limitation information relating to future events, results and expectations of Skyworks. Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will" or "continue," and similar expressions and variations (or negatives) of these words. Actual events and/or results may differ materially and adversely from such forward-looking statements as a result of certain risks and uncertainties including, but not limited to, our ability to timely and accurately predict market requirements and evolving industry standards and to identify opportunities in new markets; our ability to develop, manufacture, and market innovative products and avoid product obsolescence; our ability to compete in the marketplace and achieve market acceptance of our products: the availability and pricing of thirdparty semiconductor foundry, assembly and test capacity, raw materials and supplier components; the quality of our products; and other risks and uncertainties identified in the "Risk Factors" section of Skyworks' most recent Annual Report on Form 10-K (and/or Quarterly Report on Form 10-Q) as filed with the Securities and Exchange Commission ("SEC"). Copies of Skyworks' SEC filings can be obtained, free of charge, on Skyworks' website (www.skyworksinc.com) or at the SEC's website (www.sec.gov). Any forward-looking statements contained in this press release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
