Skyworks Releases Positive Annual Sustainability Report

Non-Financial Report Highlights Company's Commitment to Business Practices That Help Protect the Needs of Future Generations; Exhibits Improvements Made Across Several Key Environmental Programs

WOBURN, Mass., Apr 22, 2010 (BUSINESS WIRE) --Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high reliability analog and mixed signal semiconductors enabling a broad range of end markets, today announced that it has released its 2009 Sustainability Report, a voluntary document that addresses the company's commitment to operating under business practices which help protect the needs of future generations and minimize its environmental impact. The report also highlights improvements Skyworks has made in multiple areas, ranging from environmental to labor, health and safety, ethics, and business management systems.

Since 2005, the initial reporting year, Skyworks has improved energy efficiency by 26 percent, water efficiency by 44 percent, and hazardous waste efficiency by 84 percent. Carbon dioxide emissions per production unit have also decreased by 10 percent from 2005 levels, with further efficiency improvements expected in the coming years, particularly given the shift in 2009 away from manufacturing processes that use the most greenhouse gases.

At a higher level, in 2009 more than 99 percent of Skyworks' product sold was environmentally preferred, or products that meet lead (Pb)-free and restriction of hazardous substances (RoHS) standards, among a host of other global regulatory requirements. In addition, the company's sustainability programs continue to be aligned with the multiple requirements of the Electronics Industry Code of Conduct (EICC).

"Skyworks' 2009 Sustainability Report demonstrates that smart, sustainable business practices also make good business sense," said Bruce J. Freyman, Skyworks' vice president of worldwide operations. "While many of our customers require their supply chain partners to maintain robust sustainability programs, Skyworks often exceeds these requirements, even as we continue to grow our business. Our goal is to ensure that we operate in a sustainable and successful manner - respecting people *and* the environment."

About Skyworks

Skyworks Solutions, Inc. is an innovator of high reliability analog and mixed signal semiconductors. Leveraging core technologies, Skyworks offers diverse standard and custom linear products supporting automotive, broadband, cellular infrastructure, energy management, industrial, medical, military and mobile handset applications. The Company's portfolio includes amplifiers, attenuators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, mixers/demodulators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, receivers, switches and technical ceramics.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include without limitation information relating to future results and expectations of Skyworks (including without limitation certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," or "continue," and similar expressions and variations or negatives of these words. All such statements are subject to certain risks, uncertainties and other important factors that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks, uncertainties and other important factors include, but are not limited to: uncertainty regarding global economic and financial market conditions; the susceptibility of the wireless semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key

customers, or the timing of customer inventory adjustments; changes in laws, regulations and/or policies in the United States that could adversely affect financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
