

## Skyworks Enables Next-generation Wireless Automotive Platforms

*Ramping Analog and RF Solutions across General Motors, Chrysler, Fiat and Toyota*

WOBURN, Mass.--(BUSINESS WIRE)-- Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high performance analog semiconductors enabling a broad range of end markets, today announced that a tier-one automotive supplier is leveraging several of its solutions in their vehicle-based wireless platforms ramping across several leading car manufacturers. The control system enables drivers to remotely activate garage door openers, entry door locks, home lighting, security systems and entry gates. Currently offered in all automotive brands, the platform is compatible with more than 99 percent of garage door opening systems as well as a wide variety of home safety and convenience products. The three-button interface is located as an easy-to-install module in automobile rearview mirrors for a convenient, battery-free, programmable solution that eliminates the need for traditional clip-on transponders.

features for today's consumers.

### Pricing and Availability

Skyworks' new automotive solutions are currently available for both sampling and production. For additional product information, please contact [sales@skyworksinc.com](mailto:sales@skyworksinc.com).

### About Skyworks

Skyworks Solutions, Inc. is an innovator of high performance analog semiconductors. Leveraging core technologies, Skyworks supports automotive, broadband, wireless infrastructure, energy management, GPS, industrial, medical, military, wireless networking, smartphone and tablet applications. The Company's portfolio includes amplifiers, attenuators, battery chargers,

"Skyworks' advanced analog and RF solutions are being leveraged across multiple in-vehicle applications that are enhancing safety and the overall driving experience," said John O'Neill, vice president of broad markets marketing at Skyworks. "As wireless technology in automobiles continues to rise, we are capitalizing on the increasing number of addressable semiconductor opportunities that add value, minimize OEM costs and complexity, and improve time to market."

According to a market report by Transparency Market Research entitled "Connected Car Market: Global Industry Analysis, Size, Share, Growth, Trends and Forecast," the global connected car market is expected to reach \$131.9 billion by 2019, growing at a compound annual growth rate of 34.7 percent. The global connected car market is driven by safety and security services along with gaming, entertainment, traffic information, weather and location services.

### About Skyworks' [Automotive Solutions](#)

Skyworks offers a broad range of high-performance analog, mixed signal and RF semiconductors that are key components to the design of wireless automotive systems and transportation infrastructure. The company's solutions enable new safety and convenience

circulators, DC/DC converters, demodulators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, isolators, LED drivers, mixers, modulators, optocouplers, optoisolators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, power management devices, receivers, switches, technical ceramics and voltage regulators.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at: [www.skyworksinc.com](http://www.skyworksinc.com).

### **Safe Harbor Statement**

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include without limitation information relating to future results and expectations of Skyworks (e.g., certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," or "continue," and similar expressions and variations or negatives of these words. All such statements are subject to certain risks, uncertainties and other important factors that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks, uncertainties and other important factors include, but are not limited to: uncertainty regarding global economic and financial market conditions; the susceptibility of the semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the availability and pricing of third-party semiconductor foundry, assembly and test capacity, raw materials and supplier components; changes in laws, regulations and/or policies that could adversely affect either (i) the economy and our customers' demand for our products or (ii) the financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; economic, social, military and geo-political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third-party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter-than-expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including, but not limited to, those detailed from time to time in our filings with the Securities and Exchange Commission.

The forward-looking statements contained in this news release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
