

## Skyworks Powers LG's Increasingly Popular GPRS ChocolateTM Phones

## HeliosTM Power Transceiver at the Heart of Award-Winning Model; Company Now Supporting Both CDMA and GPRS Handsets

WOBURN, Mass.--(BUSINESS WIRE)--Feb. 7, 2007--Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity, today announced that LG is leveraging its Helios<sup>TM</sup> power transceiver, the highly integrated <u>SKY74400</u>, across its family of GPRS Chocolate<sup>TM</sup> phones launched in Europe and expanding to around the world later this year. Skyworks previously announced support for LG's suite of CDMA Chocolate<sup>TM</sup> phones in April 2006: http://www.skyworkinc.com/pressroom.asp

LG's KG800 GPRS Chocolate<sup>TM</sup> tri-band handset, one of several models, has a touch-sensitive navigation, and features a hidden display and touchpad that glows when activated, thus becoming 'invisible' when not in use. Its award-winning design has proven very popular with consumers, having already sold six million units around the world since it debut in early May 2006 and achieving record sales in many countries. Other features include a high-quality MP3 music player, a multi-megapixel camera with flash and video recording, Bluetooth technology for wireless transmission of voice and data between compatible devices, 128 MB of onboard memory, and a high-resolution liquid crystal display (LCD) screen.

"Skyworks is pleased to be extending its relationship with LG to now include GPRS radios for their highly popular Chocolate<sup>TM</sup> family," said Brian M. Daly, Skyworks' vice president of marketing. "Given our capabilities across virtually all air interfaces, we are delighted that our integrated solutions enable LG and others to deliver feature-rich phones with sleek designs and innovative technology for today's demanding consumers."

The Chocolate<sup>TM</sup> has won multiple design and customer satisfaction awards including Europe's Reddot Radius Trophy for the 2006 Design Team of the Year; Germany's iF Product Design Award in 2006 for innovation; the 3G CDMA Industry Achievement Award for Subscriber Technology Innovation; and the 2006 Mobile Choice Consumer Award.

Through its innovative and proprietary technology, Skyworks is providing radio architectures to several of today's leading OEMs and is the industry's only high-volume supplier across all key air interfaces, namely CDMA, GPRS and EDGE.

About Skyworks' Helios<sup>TM</sup> Power Transceiver

The SKY74400 power transceiver is a highly integrated GPRS device for quad-band applications containing a direct conversion receiver and power amplifier (PA) with an integrated PA control (iPAC<sup>TM</sup>) function in a compact, 6 x 11 mm multichip module (MCM). The receiver path implements a direct down-conversion architecture that eliminates the need for intermediate frequency (IF) components, while the transmit path uses a translation loop architecture that provides frequency up-conversion with a high-spectral purity within the transceiver and a quad-band gallium arsenide (GaAs) heterojunction bipolar (HBT) PA.

## About Skyworks

Skyworks Solutions, Inc. is an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity. The company's power amplifiers, front-end modules and direct conversion transceivers are at the heart of many of today's leading-edge multimedia handsets. Leveraging core technologies, Skyworks also offers a diverse portfolio of linear products that support automotive, broadband, cellular infrastructure, industrial and medical applications.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at <u>www.skyworksinc.com</u>.

## Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results

and expectations of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates", "expects", "intends", "believes", "plans", "may", "will", "continue", similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by our, and our customers', products; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; our reliance on a several key customers for a large percentage of our sales; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; and the uncertainties of litigation, including disputes over intellectual property, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
