Skyworks Unveils Family of High Power Control Devices for Diverse Market Applications

50 and 100 Watt Solutions Being Leveraged by Multiple Tier-One Base Station Manufacturers; Broadens Product Portfolio and Supports Diversification Strategy

MONTREAL--(BUSINESS WIRE)--Jun. 20, 2012-- Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high reliability analog semiconductors enabling a broad range of end markets, today introduced a line of high power RF switches – up to 100 Watts – supporting diverse market applications including TD-LTE infrastructure base stations, repeaters and low frequency military/microwave UHF and UVF radios. Skyworks' highly integrated single pole double throw (SPDT) solutions offer customers high performance, cost competitive devices in a compact design.

“Skyworks is delighted to be offering customers unique and innovative products for their demanding RF design needs,” said David Stasey, vice president of Analog Components at Skyworks. “By replacing expensive mechanical switches and complicated relays, our newest devices simplify architectures for applications with challenging power levels. With design wins at several tier one customers, Skyworks continues to leverage its broad technical leadership and scale across multiple and diverse markets.”

About Skyworks' New High Power SPDT Switches

The [SKY12207-478LF](#) (0.9 – 4.0 GHz), [SKY12208-306LF](#) (0.02 – 2.7 GHz) and [SKY12210-478LF](#) (0.9 – 4.0 GHz) are high power SPDT silicon-based PIN diode switches. The 4 x 4 millimeter, 16-pin quad flat no lead packaged devices features low insertion loss (0.4dB), high isolation (44 dB), excellent power handling (50 and 100 Watts) and superb linearity with low direct current (DC) power consumption. They all operate with a 5 or 28 V positive DC voltage supply across a broad frequency range (20 MHz – 4.0 GHz). Skyworks has also developed a complementary driver application circuit to align with these switches.

Pricing and Availability

Skyworks' new switches are currently available. For volume pricing, samples, evaluation boards and integrated driver circuit, please contact sales@skyworksinc.com.

Skyworks at IEEE MTT-S 2012

Skyworks will be exhibiting its products in booth #1507 at MTT-S 2012, being held June 19-21 in Montreal.

About Skyworks

Skyworks Solutions, Inc. is an innovator of high reliability analog semiconductors. Leveraging core technologies, Skyworks offers high performance analog products supporting automotive, broadband, cellular infrastructure, energy management, industrial, medical, military, wireless networking, smartphone and tablet applications. The Company's portfolio includes amplifiers, attenuators, circulators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, isolators, lighting and display solutions, mixers/demodulators, optocouplers, optoisolators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, power management devices, receivers, switches and technical ceramics.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes “forward-looking statements” intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include without limitation information relating to future results and expectations of Skyworks (including without limitation certain projections and business trends). Forward-looking statements can often be identified by words such as “anticipates,” “expects,” “forecasts,” “intends,” “believes,” “plans,” “may,” “will,” or “continue,” and similar expressions and variations or negatives of these words. All such statements are subject to certain risks, uncertainties and other important factors that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks, uncertainties and other important factors include, but are not limited to: uncertainty regarding global economic and financial market conditions; the susceptibility of the wireless semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the availability and pricing of third party semiconductor foundry, assembly and test capacity, raw materials and supplier components; changes in laws, regulations and/or policies in the United States that could adversely affect financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; whether we are able to successfully integrate Advanced Analogic Technologies' operations; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including, but not limited to, those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
