NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Skyworks Solutions, Inc. together with its consolidated subsidiaries, ("Skyworks" or the "Company") is an innovator of high performance analog semiconductors. Leveraging core technologies, the Company supports automotive, broadband, cellular infrastructure, energy management, GPS, industrial, medical, military, wireless networking, smartphone and tablet applications. The Company's portfolio consists of amplifiers, attenuators, battery chargers, circulators, DC/DC converters, demodulators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, isolators, LED drivers, mixers, modulators, optocouplers, optoisolators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, power management devices, receivers, switches, technical ceramics, and voltage regulators.

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") for interim financial reporting. Certain information and footnote disclosures, normally included in annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), have been condensed or omitted pursuant to those rules and regulations. However, in management's opinion, the financial information reflects all adjustments, including those of a normal recurring nature necessary to present fairly the results of operations, financial position and cash flows of the Company for the periods presented. The results of operations, financial position, and cash flows for the Company during the interim periods are not necessarily indicative of those expected for the full year. This information should be read in conjunction with the Company's financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the fiscal year ended September 27, 2013, filed with the SEC on November 18, 2013, as amended by Amendment No. 1 to such Annual Report on form 10-K, filed with the SEC on January 27, 2014 (the "2013 10-K").

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts of assets, liabilities, revenue, expenses, comprehensive income and accumulated other comprehensive loss that are reported in these unaudited consolidated financial statements and accompanying disclosures. The Company evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment. Significant judgment is required in determining the recognition and/or disclosure of reserves for and fair value of items such as inventory, income taxes, share-based compensation, loss contingencies, subsequent events (which the Company has evaluated through the date of issuance of these unaudited consolidated financial statements), bad debt allowances, intangible assets associated with business combinations, and overall fair value assessments of assets and liabilities, particularly those classified as Level 2 or Level 3 in the fair value hierarchy. In addition, significant judgment is required in determining whether a potential indicator of impairment of long-lived assets exists and in estimating future cash flows for any necessary impairment tests. Actual results could differ significantly from these estimates.

The Company's fiscal year ends on the Friday closest to September 30. Fiscal 2014 consists of 53 weeks and ends on October 3, 2014. Fiscal 2013 consisted of 52 weeks and ended on September 27, 2013. The first quarters of fiscal 2014 and fiscal 2013 each consisted of 13 weeks and ended on December 27, 2013, and December 28, 2012, respectively.

2. FAIR VALUE

Fair value is the price that would be received from selling an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants as of the measurement date. Applicable accounting guidance provides a hierarchy for inputs used in measuring fair value that prioritize the use of observable inputs over the use of unobservable inputs, when such observable inputs are available. The three levels of inputs that may be used to measure fair value are as follows:

- Level 1 Quoted prices in active markets for identical assets or liabilities.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets with insufficient volume or infrequent transactions (less active markets), or model-driven valuations in which all significant inputs are observable or can be derived principally from, or corroborated with, observable market data.
- Level 3 Fair value is derived from valuation techniques in which one or more significant inputs are unobservable, including assumptions and judgments made by the Company.

Assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurements. The Company reviews the fair value hierarchy classification on a quarterly basis. Changes in the observable inputs may result in a reclassification of assets and liabilities within the three levels of the hierarchy outlined above.

Assets and Liabilities Measured and Recorded at Fair Value on a Recurring Basis

The Company measures certain assets and liabilities at fair value on a recurring basis, such as our financial instruments, which currently consist of marketable securities, and recognizes transfers within the fair value hierarchy at the end of the fiscal quarter in which the change in circumstances that caused the transfer occurred. There have been no transfers between Level 1, 2 or 3 assets during the three months ended December 27, 2013.

As of December 27, 2013, the Company's marketable securities include an auction rate security that was classified as available for sale and recorded in other long-term assets. This security is scheduled to mature in 2017. Due to the illiquid market for this security the Company has classified the carrying value as a Level 3 asset with the difference between the par and carrying value being categorized as a temporary loss and recorded in accumulated other comprehensive loss

As of December 27, 2013, assets recorded at fair value on a recurring basis consist of the following (in millions):

	•	Fair Value Measurements							
	Total	Quoted Prices in Significant Active Markets for Other Identical Assets Observable Inputs (Level 1) (Level 2)					Significant servable Inputs (Level 3)		
Assets

Auction rate securities	2.3		_		_		2.3		
Total	\$ 331.1	\$	328.8	\$	_	\$	2.3		

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

The Company's non-financial assets and liabilities, such as goodwill, intangible assets, and other long-lived assets resulting from business combinations are measured at fair value using income approach valuation methodologies at the date of acquisition and subsequently re-measured if there are indicators of impairment. There were no indicators of impairment identified during the three months ended December 27, 2013.

5. GOODWILL AND INTANGIBLE ASSETS

There were no changes to the carrying amount of goodwill during the three months ended December 27, 2013.

The Company tests its goodwill and non-amortizing trademarks for impairment annually as of the first day of its fourth fiscal quarter and in interim periods if certain events occur indicating the carrying value of goodwill or non-amortizing trademarks may be impaired. There were no indicators of impairment noted during the three months ended December 27, 2013.

Intangible assets consist of the following (in millions):

Table of Contents

The difference between the Company's effective tax rate of 18.5% and the 35% United States federal statutory rate for the three months ended December 27, 2013, resulted primarily from foreign earnings taxed at rates lower than the United States federal statutory rate, the domestic production activities deduction, and a tax benefit related to an adjustment to the Company's deferred taxes in Mexico as a result of a change in Mexican tax law, partially offset by an increase in the Company's tax expense related to a change in the Company's reserve for uncertain tax positions.

In December 2013, Mexico enacted a comprehensive tax reform package, which became effective on January 1, 2014. As a result of this change, the Company adjusted its deferred taxes in that jurisdiction resulting in the recognition of a tax benefit that reduced the Company's foreign income tax expense by \$4.5 million for the three months ended December 27, 2013.

The difference between the Company's effective tax rate of 23.4% and the 35% United States federal statutory rate for the three months ended December 28, 2012, resulted primarily from foreign earnings taxed at rates lower than the federal statutory rate and the domestic production activities deduction, partially offset by an increase in the Company's tax expense related to a change in the Company's reserve for uncertain tax positions.

7. COMMITMENTS AND CONTINGENCIES

Legal Matters

From time to time, various lawsuits, claims and proceedings have been, and may in the future be, instituted or asserted against the Company, including those pertaining to patent infringement, intellectual property, environmental hazards, product liability and warranty, safety and health, employment and contractual matters

The semiconductor industry is characterized by vigorous protection and pursuit of intellectual property rights. From time to time, third parties have asserted and may in the future assert patent, copyright, trademark and other intellectual property rights to technologies that are important to the Company's business and have demanded and may in the future demand that the Company license their technology. The outcome of any such litigation cannot be predicted with certainty and some such lawsuits, claims or proceedings may be disposed of unfavorably to the Company. Generally speaking, intellectual property disputes often have a risk of injunctive relief, which, if imposed against the Company, could materially and adversely affect the Company's financial condition, or results of operations. From time to time the Company may also be involved in legal proceedings in the ordinary course of business. Legal costs are expensed as incurred.

The Company monitors the status of legal proceedings and other contingencies on an ongoing basis to ensure amounts are recognized and/or disclosed in our financial statements and footnotes as required by Accounting Standards Codification 450, *Loss Contingencies*. At the time of this filing, the Company had not recorded any accrual for loss contingencies associated with its legal proceedings as losses resulting from such matters were determined not to be probable. The Company does not believe there are any pending legal proceedings that are reasonably possible to result in a material loss. We are engaged in various legal actions in the normal course of business and, while there can be no assurances, the Company believes the outcome of all pending litigation involving the Company will not have, individually or in the aggregate, a material adverse effect on our business.

Guarantees and Indemnifications

The Company has made no contractual guarantees for the benefit of third parties. However, the Company generally indemnifies its customers from third-party intellectual property infringement litigation claims related to its products, and, on occasion, also provides other indemnities related to product sales. In connection with certain facility leases, the Company has indemnified its lessors for certain claims arising from the facility or the lease.

The Company indemnifies its directors and officers to the maximum extent permitted under the laws of the state of Delaware. The duration of the indemnities varies, and in many cases is indefinite. The indemnities to customers in connection with product sales generally are subject to limits based upon the amount of the related product sales and in many cases are subject to geographic and other restrictions. In certain instances, the Company's indemnities do not provide for any limitation of the maximum potential future payments the Company could be obligated to make. As of December 27, 2013, the Company had not recorded any liability for these indemnities in the accompanying consolidated balance sheets. The Company continues to monitor and reassess indemnities each reporting period.

8. COMMON STOCK REPURCHASE

On July 16, 2013, the Board of Directors approved a stock repurchase program, pursuant to which the Company is authorized to repurchase up to \$250.0 million of the Company's common stock from time to time on the open market or in privately negotiated transactions, as permitted by securities laws and other legal requirements. During the three months ended December 27, 2013, the Company paid approximately \$17.1 million (including commissions) in connection with the repurchase of 0.7 million shares of its common stock (paying an average price of \$25.47 per share). As of December 27, 2013, \$212.5 million remained available under the existing share repurchase authorization.

Basic earnings per share are calculated by dividing net income by the weighted average number of shares of the Company's common stock outstanding. The calculation of diluted earnings per share includes the dilutive effect of equity based awards that were outstanding during the three months ended December 27, 2013, and December 28, 2012, using the treasury stock method. Certain of the Company's outstanding stock options, noted in the table above, were excluded because they were anti-dilutive, but could become dilutive in the future.

10. RESTRUCTURING AND OTHER CHARGES

During the three months ended December 28, 2012, the Company recorded \$1.6 million in employee severance costs primarily related to the front-end solutions restructuring plan that was implemented during the period.

Activity and liability balances for the three months ended December 27, 2013, related to the Company's restructuring actions are as follows (in millions):

OVERVIEW

We, together with our consolidated subsidiaries, are an innovator of high performance analog semiconductors. Leveraging core technologies, we support automotive, broadband, cellular infrastructure, energy management, GPS, industrial, medical, military, wireless networking, smartphone and tablet applications. Our portfolio consists of amplifiers, attenuators, battery chargers, circulators, DC/DC converters, demodulators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, isolators, LED drivers, mixers, modulators, optocouplers, optoisolators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, power management devices, receivers, switches, technical ceramics, and voltage regulators.

GENERAL

During the three months ended December 27, 2013, the following key factors contributed to our overall results of operations, financial position and cash flows:

- Increased net revenue over 11% to \$505 million for the three months ended December 27, 2013, due to our continued growth as smartphones displace traditional cellular phones, tablet computing increases in popularity and our analog product portfolio expands to address additional content within the handset, tablet and adjacent vertical markets including medical, automotive, military and industrial.
- Increased operating margin by 390 basis points to approximately 23%. This increase in operating margin was primarily related to higher revenue and improved gross margin partially offset by higher employee compensation expense.
- As a result of the aforementioned factors, overall profitability increased significantly for the three months ended December 27, 2013, with net income and diluted earnings per share increasing by 42% and 44%, respectively, over the corresponding period in fiscal 2013.
- Our ending cash and cash equivalents balance increased approximately 27% to \$649 million from \$511 million as of September 27, 2013. This was
 the result of \$159 million in cash from operations for the three months ended December 27, 2013, due to higher net income and improvements in
 working capital.

NET REVENUE

	Three Months Ended				
	Dece	December 27, 2013 Ch		Decemb hange 201	
(dollars in millions)					
Net revenue	\$	505.2	11.4%	\$	453.7

We market and sell our products directly to original equipment manufacturers of communications and electronics products, third-party original design manufacturers and contract manufacturers, and indirectly through electronic components distributors. We generally experience seasonal peaks during the second half of the calendar year primarily as a result of increased worldwide production of consumer electronics in anticipation of increased holiday sales. In addition, we periodically enter into revenue generating arrangements that leverage our broad intellectual property portfolio by licensing or selling our non-core patents or other intellectual property, and we anticipate continuing this intellectual property strategy in future periods.

We generated net revenue of \$505.2 million for the three months ended December 27, 2013, an increase of \$51.5 million or 11.4% when compared to \$453.7 million for the corresponding period in fiscal 2013. The increase in revenue was primarily driven by our ability to capture a higher share of the increasing RF and analog content per device as smartphones continue to displace traditional cellular phones, the increasing popularity in tablet computing, and our expanding analog product portfolio supporting new vertical markets including medical, automotive, military and industrial.

GROSS PROFIT

	Three Months Ended

in millions)					
it	\$	222.0	15.3%	\$	192.6
		43.9%			42.4%

Gross profit represents net revenue less cost of goods sold. Our cost of goods sold consists primarily of purchased materials, labor and overhead (including depreciation and share-based compensation expense) associated with product manufacturing. Erosion of average selling prices of established products is typical of the semiconductor industry. Consistent with trends in the industry, we anticipate that average selling prices for our established products will continue to decline at a normalized rate of five to ten percent per year. As part of our normal course of business, we mitigate the gross margin impact of declining average selling prices with efforts

Table of Contents

to increase unit volumes, reduce material costs, improve manufacturing efficiencies, lower manufacturing costs of existing products and by introducing new and higher value-added products.

Gross profit was \$29.4 million greater for the three months ended December 27, 2013, than in the corresponding period in fiscal 2013. The increase in gross profit was the result of higher unit volumes and lower per unit materials and manufacturing costs with an aggregate gross profit benefit of approximately \$30.1 million. This benefit was partially offset by the erosion of our average selling price and changes in product mix having a combined unfavorable impact on gross profit of approximately \$0.7 million. As a result, gross profit margin increased from 42.4% for the three months ended December 28, 2012, to 43.9% for the three months ended December 27, 2013.

During the three months ended December 27, 2013, we continued to benefit from higher contribution margins associated with the licensing and/or sale of intellectual property.

RESEARCH AND DEVELOPMENT

		Three Months Ended

ollars in millions)							
esearch and development	:	\$	58.4	0.5%	\$	58.1	
of net revenue			11.6%			12.8%	

Research and development expenses consist primarily of direct personnel costs including share-based compensation expense, costs for pre-production evaluation and testing of new devices, masks, engineering prototypes and design tool costs.

The increase in research and development expenses for the three months ended December 27, 2013, when compared to the corresponding period in fiscal year 2013, is primarily related to increased compensation expense. Research and development expense decreased as a percentage of net revenue due to the aforementioned increase in net revenue.

SELLING, GENERAL AND ADMINISTRATIVE

(dollars in millions)					
Selling, general and administrative	\$	41.1	7.9%	\$	38.1

Selling, general and administrative expenses include legal and related costs, accounting, treasury, human resources, information systems, customer service, bad debt expense, sales commissions, share-based compensation expense, advertising, marketing, costs associated with business combinations completed or contemplated during the period and other costs.

Selling, general and administrative expenses increased by 7.9% for the three months ended December 27, 2013 as compared to the corresponding period in fiscal 2013, primarily related to increased compensation expense. Selling, general and administrative expenses decreased as a percentage of net revenue due to the aforementioned increase in net revenue.

AMORTIZATION OF INTANGIBLES

Amortization of intangibles	\$	6.5	(20.7)%	\$	8.2		
% of net revenue		1.3%			1.8%		

The decrease in amortization expense for the three months ended December 27, 2013, is due to the end of the estimated useful lives of certain fully amortized intangible assets that were acquired in prior fiscal years.

We did not incur any restructuring or related charges during the three months ended December 27, 2013. During the three months ended December 28, 2012, we recorded \$1.6 million in restructuring charges related to the front-end solutions restructuring plan.

PROVISION FOR INCOME TAXES

		Three Months Ended				
	_	December 27, 2013 Change		D	ecember 28, 2012	
(dollars in millions)						
Provision for income taxes	9	§ 21.	5.9%	\$	20.3	
% of net revenue		4.	3%		4.5%	

We recorded a provision for income taxes of \$21.5 million (which consisted of \$23.7 million related to United States taxes and an offsetting benefit of \$2.2 million related to foreign income taxes) and \$20.3 million (which consisted of \$17.8 million and \$2.5 million for United States and foreign income taxes, respectively) for the three months ended December 27, 2013, and December 28, 2012, respectively.

The effective tax rate for the three months ended December 27, 2013 was 18.5% as compared to 23.4% for the corresponding period in fiscal 2013. The difference between our year-to-date effective tax rate of 18.5% and the federal statutory rate of 35% is principally due to the recognition of foreign earnings taxed at rates lower than the federal statutory rate, the domestic production activities deduction and a tax benefit related to an adjustment of our deferred taxes in Mexico as a result of a change in Mexican tax law, partially offset by an increase in our tax expense related to a change in our reserve for uncertain tax positions.

In December 2013, Mexico enacted a comprehensive tax reform package, which became effective on January 1, 2014. As a result of this change, we adjusted our deferred taxes in that jurisdiction resulting in the recognition of a tax benefit that reduced our foreign income tax expense by \$4.5 million for the three months ended December 27, 2013.

LIQUIDITY AND CAPITAL RESOURCES

		Three Months Ended		
(dollars in millions)	Dec	ember 27, 2013	Dec	ember 28, 2012
Cash and cash equivalents at beginning of period	\$	511.1	\$	306.3
Net cash provided by operating activities		158.8		147.6
Net cash used in investing activities		(16.3)		(25.6)
Net cash used in financing activities		(5.0)		(50.8)
Cash and cash equivalents at end of period	\$	648.6	\$	377.5

Cash Flow from Operating Activities:

Our cash flow from operating activities consists of net income for the period adjusted for certain non-cash items and changes in certain operating assets and liabilities. During the three months ended December 27, 2013, we generated \$158.8 million of cash flow from operating activities, an increase of \$11.2 million when compared to \$147.6 million generated during the three months ended December 28, 2012. The increase in cash flow from operating activities during the three months ended December 27, 2013 was related to higher net income combined with a net cash inflow from changes in operating assets and liabilities in addition to increases in depreciation and share-based compensation expense. Specifically, the changes in operating assets and liabilities that resulted in sources of cash were: \$25.6 million due to the collections of outstanding accounts receivable during the period related prior quarter customer shipments, \$20.6 in other current and long-term liabilities primarily driven by the timing of tax related items a

Table of Contents

nd \$4.9 million related to inventory. The offsetting change in operating liabilities was a use of cash of \$19.2 million resulting in a decrease to accounts payable due to the timing of vendor payments during the period.

Cash Flow from Investing Activities:

Our cash flow from investing activities consists primarily of cash paid for acquisitions, net of cash acquired, capital expenditures, cash received from the sale of capital assets and the sale and maturity of investments. Cash flow used in investing activities was \$16.3 million during the three months ended December 27, 2013 compared to \$25.6 million during the three months ended December 28, 2012. The decrease in cash used in investing activities was driven by a higher level of capital expenditures during the three months ended December 28, 2012 related to the purchases of manufacturing equipment to support increased production demand from key customers at our wafer fabrication facility located in Massachusetts and our assembly and test facility in Mexicali, Mexico.

Cash Flow from Financing Activities:

Our cash flows from financing activities consist primarily of cash transactions related to our equity and debt. During the three months ended December 27, 2013 we had net cash outflows from financing activities of \$5.0 million, compared to net cash outflows from financing activities of \$50.8 million during the three months ended December 28, 2012. The decrease in cash used in financing activities was primarily driven by the higher share repurchase activity during the three months ended December 28, 2012. During the three months ended December 27, 2013 we had the following significant uses of cash:

- \$18.0 million related to payroll tax withholdings on the vesting of employee performance and restricted stock awards, and
- \$17.1 million related to our repurchase of approximately 0.7 million shares of our common stock pursuant to the share repurchase program approved by our Board of Directors on July 16, 2013.

These uses of cash were partially offset by the net proceeds from cash payments from employee stock option exercises of \$18.4 million and the excess tax benefit from stock option exercises of \$11.7 million during the three months ended December 27, 2013.

Liauidity:

Cash and cash equivalent balances were \$648.6 million at December 27, 2013 representing an increase of \$137.5 million from September 27, 2013. The increase resulted from \$158.8 million in cash generated from operations which is partially offset by \$17.1 million used to repurchase 0.7 million shares of stock and \$16.3 million in capital expenditures. Based on our historical results of operations, we expect that our cash and cash equivalents on hand and the cash we expect to generate from operations will be sufficient to fund our research and development, capital expenditures, working capital and other cash requirements for at least the next 12 months. However, we cannot be certain that our cash on hand and cash generated from operations will be available in the future to fund all of our capital and operating requirements. In addition, any future strategic investments and acquisitions may require additional cash and capital resources. If we are unable to obtain sufficient cash or capital to meet our needs on a timely basis and on favorable terms, our business and operations could be materially and adversely affected.

Our invested cash balances primarily consist of highly liquid term deposits with original maturities of 90 days or less and money market funds where the underlying securities primarily consist of United States treasury obligations, United States agency obligations and repurchase agreements collateralized by United States government and agency obligations.

Our cash and cash equivalent balance of \$648.6 million at December 27, 2013, consisted of \$364.4 million held domestically and \$284.2 million held by foreign subsidiaries. Of the cash and cash equivalents held by our foreign subsidiaries at December 27, 2013 \$221.4 million is considered by us to be indefinitely reinvested and would be subject to material tax effects if repatriated. The remaining \$62.8 million of foreign cash and cash equivalents can be repatriated without any tax consequences.

CONTRACTUAL OBLIGATIONS

Our contractual obligations disclosure in the 2013 10-K has not materially changed since we filed that report.

OFF-BALANCE SHEET ARRANGEMENTS

We have no material off-balance sheet arrangements as defined in SEC Regulation S-K- 303(a)(4)(ii).

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In July 2013, the Financial Accounting Standards Board issued an Accounting Statement Update on income taxes to improve the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This guidance is expected to reduce diversity in practice and better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exists. This guidance is not effective for us until fiscal 2015. The adoption of this guidance is not expected to have a material impact to our financial position or results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are subject to investment risk, interest rate risk, and foreign exchange rate risk as described below.

Investment and Interest Rate Risk

Our exposure to interest rate and general market risks relates principally to our investment portfolio, which consists of the following (in millions):

	December 27, 2013
Cash and cash equivalents (time deposits, certificates of deposit and money market funds)	\$ 648.6
Available for sale securities (auction rate securities) at carrying value	2.3
	\$ 650.9

The main objectives of our investment activities are the liquidity and preservation of capital. Our cash equivalent investments have short-term maturity periods that dampen the impact of market or interest rate risk. Credit risk associated with our investments is not material as our money market and deposits are diversified across several financial institutions with high credit ratings which reduces the amount of credit exposure to any one counter party. We currently do not use derivative instruments for trading, speculative or investment purposes; however, we may use derivatives in the future

Based on our results of operations for the three months ended December 27, 2013, a hypothetical reduction in the interest rates on our cash and cash equivalents to zero would result in an immaterial reduction of interest income with a de minimis impact to income before income taxes.

We own \$3.2 million of par value auction rate securities that currently are valued at \$2.3 million as of December 27, 2013. In the event that the market conditions change in the future and our auction rate security becomes fully and permanently impaired, the impact to income before income taxes would be the par value of the auction rate security of approximately \$3.2 million as of December 27, 2013.

Given the low interest rate environment, the objectives of our investment activities, and the relatively low interest income generated from our cash and cash equivalents and other investments, we do not believe that investment or interest rate risks pose material exposures to our current business or results of operations.

Exchange Rate Risk

Substantially all sales to our customers and our arrangements with third-party manufacturers provide for pricing and payment in United States dollars, thereby reducing the impact of foreign exchange rate fluctuations on our results. A small percentage of our international operational expenses are denominated in foreign currencies and exchange rate volatility could positively or negatively impact those operating costs. Increases in the value of the United States dollar relative to other currencies could make our products more expensive, which could negatively impact our ability to compete. Conversely, decreases in the value of the United States dollar relative to other currencies could result in our suppliers raising their prices to continue doing business with us. Given the relatively small number of customers and arrangements with third-party manufactures denominated in foreign currencies, we do not believe that foreign exchange volatility has a material impact to our current business or results of operations. However, fluctuations in currency exchange rates could have a greater effect on our business or results of operations in the future to the extent our expenses increasingly become denominated in foreign currencies.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures.

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of December 27, 2013. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on management's evaluation of our disclosure controls and procedures as of December 27, 2013, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in internal controls over financial reporting.

There are no changes to our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, various lawsuits, claims and proceedings have been, and may in the future be, instituted or asserted against us, including those pertaining to patent infringement, intellectual property, environmental hazards, product liability and warranty, safety and health, employment and contractual matters.

The semiconductor industry is characterized by vigorous protection and pursuit of intellectual property rights. From time to time, third parties have asserted and may in the future assert patent, copyright, trademark and other intellectual property rights to technologies that are important to our business and have demanded and may in the future demand that we license their technology. The outcome of any such litigation cannot be predicted with certainty and some such lawsuits, claims or proceedings may be disposed of unfavorably to us. Generally speaking, intellectual property disputes often have a risk of injunctive relief, which, if imposed against us, could materially and adversely affect our financial condition, or results of operations. From time to time we may also be involved in legal proceedings in the ordinary course of business. Legal costs are expensed as incurred.

Item 1A. Risk Factors.

In addition to the other information set forth in this quarterly report on Form 10-Q, you should carefully consider the factors discussed in Part I, Item 1A Risk Factors in the 2013 10-K, which could materially affect our business, financial condition or future results. There have been no material changes from the risk factors previously disclosed in the 2013 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table provides information regarding repurchases of common stock made during the three months ended December 27, 2013:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)
09/28/13-10/25/13	5,417(2)	\$24.92	_	\$229.6 million
10/26/13-11/22/13	1,144,214(3)	\$25.24(3)	444,866	\$218.4 million
11/23/13-12/27/13	232,672(4)	\$25.89(4)	224,770	\$212.5 million
Total	1,382,303			

- (1) The share repurchase program approved by the Board of Directors on July 16, 2013, authorizes the repurchase of up to \$250.0 million of our common stock from time to time on the open market or in privately negotiated transactions as permitted by securities laws and other legal requirements. The share repurchase program is scheduled to expire on July 16, 2015.
- (2) Represents shares repurchased by us at the fair market value of the common stock as of the applicable purchase date, in connection with the satisfaction of tax withholding obligations under restricted stock agreements.
- (3) 444,866 shares were repurchased at an average price of \$25.28 per share as part of our share repurchase program. 699,348 shares were repurchased at an average price of \$25.22 per share in connection with the satisfaction of tax withholding obligations under restricted stock agreements.
- (4) 224,770 shares were repurchased at an average price of \$25.85 per share as part of our share repurchase program. 7,902 shares were repurchased at an average price of \$26.99 per share in connection with the satisfaction of tax withholding obligations under restricted stock agreements.

FY14 Executive Incentive Plan

- 1. **Purpose:** The FY14 Executive Incentive Plan (the"FY14 Plan") is designed to reward key management for achieving certain financial and business objectives.
- 2. **Plan Period:** The FY14 Plan covers the period from September 28, 2013 through October 3, 2014.
- Eligibility: This program applies to the Chief Executive Officer and his direct reporting senior executives. Other key employees may be added based upon the recommendation of the Chief Executive Officer and subsequent approval of the Compensation Committee. Those employees not covered by this plan may be eligible for other programs established by Skyworks.
- 4. **Incentive Targets:** Participants are eligible to earn a percentage of their base salary for attaining certain performance objectives. Nominal, target and stretch incentive awards have been established as follows (shown as a percentage of the participant's base salary):

Name	Incentive At Nominal	Incentive At Target	Incentive At Stretch	
CEO	75.0%	150.0%	300.0%	
EVP, GM	40.0%	80.0%	160.0%	
CFO	37.5%	75.0%	150.0%	
VP Ops, VP Sales	35.0%	70.0%	140.0%	
Other VPs	27.5%	55.0%	110.0%	

5. **Metrics:** The performance metrics for FY14 are as follows:

Metric	Nominal	Target	Stretch
Revenue	REDACTED	REDACTED	REDACTED
Operating Income (%)	REDACTED	REDACTED	REDACTED

Performance periods are annual. The individual metrics above are for normal operations and any extraordinary events and/or charges will be brought to the Compensation Committee for review and approval.

Metrics will be weighted based on corporate performance for FY14 as follows:

	Revenue	Operating Income (%)
All Executives	50%	50%

- 6. **How the Plan Works:** Upon completion of the Fiscal Year, the Chief Executive Officer will provide the Compensation Committee with recommendations for incentive award payments to the named participants of the plan. The Committee will review the recommendations and approve the actual amount to be paid to each participant. The Committee will rely upon the CEO for the appropriate distribution of the authorized incentive pool. All incentive award payments under the FY14 Plan, if earned, will be paid by March 15th of the calendar year following the end of the fiscal year in which the performance occurs.
- 7. **Administration:** Actual performance between the Nominal and Target metrics will be paid on a linear sliding scale beginning at the Nominal percentage and moving up to the Target percentage. The same linear scale will apply for performance between Target and Stretch metrics. In order to fund the incentive plans and insure the overall Company's financial performance, the following terms apply.
 - No incentive award will be paid unless the Company meets its Nominal operating income goal after accounting for any incentive award payments.
 - Incentive payments will be processed in a timely manner at the completion of the performance period. Skyworks' CEO, subject to approval by the Compensation Committee, retains discretion to award below nominal or above Stretch and to modify all individual incentive payments to ensure equitable distribution of incentives; such modifications may include, but are not limited to, the delivery of equity or similar instruments in lieu of cash payments.
 - Any payout shall be conditioned upon the Participant's employment by the Company on the date of payment; provided, however, that the Compensation Committee may make exceptions to this requirement, in its sole discretion, including, without limitation, in the case of a participant's termination of employment, retirement, death or disability.
- 8. **Taxes:** All awards are subject to federal, state, local and social security taxes. Payments under this Plan will not affect the base salary, which is used as the basis for Skyworks' benefits program.
- Amendments: The Company reserves the right to amend or terminate the FY14 Plan at any time in its sole discretion.

CERTIFICATION OF THE CEO PURSUANT TO SECURITIES EXCHANGE ACT RULES 13a-14(a) AND 15d-14(a) AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002
