Skyworks Launches Industry's First RF Subsystem for GSM/GPRS/EDGE Femtocell Base Stations and Cellular Repeaters

Highly Integrated System Solution Reduces Space, Cost, and Design-Cycle Time While Providing World-Class Performance

WOBURN, Mass.--(BUSINESS WIRE)--July 28, 2008--Skyworks Solutions, Inc. (NASDAQ: SWKS), an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity, today introduced the industry's first highly integrated [RF subsystem](#) for GSM, GPRS and EDGE femtocell base stations and cellular repeaters. The RF subsystem supports femtocell base station and cellular repeaters in GSM850, EGSM900, DCS1800 and PCS1900 frequency bands.

As mobile usage significantly increases, operators are exploring new ways to expand capacity and coverage, while fundamentally wrestling with expensive site acquisition and call-quality problems. In addition, one of the key challenges for OEMs is to make these femtocell base stations affordable for the consumer market.

"Skyworks' new and innovative RF subsystem solves a variety of real-world issues that manufacturers face daily," said Stan Swearingen, Skyworks' vice president and general manager of Linear Products. "Ultimately, we're enabling them to reap considerable benefits by reducing space, expense, and time-to-market."

Skyworks' new dual-chip RF subsystem solution also provides excellent linearity, blocker performance, dynamic range, and output power required by cellular operators, carriers and equipment manufacturers deploying femtocell base stations and cellular repeaters globally.

Femtocells, or small cellular home base stations designed for residential and small business environments, provide enhanced indoor cellular coverage and increase overall network capacity, while at the same time lowering backhaul costs and capital expenditure. The cellular repeaters extend services in poor coverage areas by amplifying both transmit and receive signals. In addition, the repeaters reduce problems with signal fades and dropped calls while improving voice quality, service range and access.

According to In-Stat, worldwide femtocell subscriptions (installed devices) are expected to grow to 40 million by 2011 and represent a market opportunity of over \$4 billion.

Pricing and Availability

Skyworks' RF subsystem is available now and is priced at \$15.00 each in quantities of 10,000. For more information regarding Skyworks' product portfolio, please contact us at sales@skyworksinc.com or visit Skyworks' Web site at www.skyworksinc.com.

About Skyworks

Skyworks Solutions, Inc. is an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity. The company's power amplifiers, front-end modules and direct conversion radios are at the heart of many of today's leading-edge multimedia handsets. Leveraging core technologies, Skyworks also offers a diverse portfolio of linear products that support automotive, broadband, cellular infrastructure, industrial and medical applications.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results and expectations of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial

position and cash flows.

These risks and uncertainties include, but are not limited to: uncertainty regarding global economic and financial market conditions; the cyclical nature of the semiconductor industry and the markets addressed by our, and our customers', products; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; and the uncertainties of litigation, including disputes over intellectual property, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
