Skyworks Enables Samsung's Newest Handsets, Including Popular Touch Screen Mobile Phones

Secures Design Wins for over 10 Additional Multimode Platforms

WOBURN, Mass.--(BUSINESS WIRE)--Jun. 1, 2009-- Skyworks Solutions, Inc. (NASDAQ: SWKS), an innovator of high reliability analog and mixed signal semiconductors enabling a broad range of end markets, today announced that Samsung is leveraging its EDGE front-end solutions to power a variety of new handsets including the S5230 mobile phone, one of several new full touch-screen offerings recently launched in European markets. In addition, Skyworks is supporting the Samsung S3310, an ultra thin quad band GSM/EDGE candy bar mobile phone capable of global roaming.

"Skyworks is delighted to support Samsung as it enhances its position as a leading player in the hugely popular touch screen mobile market," said Liam K. Griffin, Skyworks' senior vice president of sales and marketing. "We look forward to further strengthening our partnership with Samsung as they add to their portfolio of innovative platforms that combine all essential multimedia functionality into a single device."

About Samsung's New Handsets

Measuring just 11.9 millimeters (mm), the S5230 has a three inch auto-rotating touch screen containing Samsung's patented TouchWiz™ user interface, making entering data and text simple with fingerwipe navigation. The handset also contains a QWERTY keyboard, and comes with a built-in 3.0 megapixel (MP) camera that can record quarter video graphics array (QVGA) resolution video at 15 frames per second. The phone also supports domain names search engine for better sound quality.

With just a 2.1 inch thin film transistor (TFT) display, the S3310 contains QVGA resolution with 16 million colors. The 2.0 MP camera provides up to 30 frames per second of video recording capabilities. Additional features include an MP3 player and FM tuner with radio data system (RDS), Bluetooth® 2.1 and universal serial bus (USB) 2.0 connectivity, 30 megabytes (MB) of internal memory, and a slot for microSDHC memory cards up to 8 gigabytes (GB).

About Skyworks

Skyworks Solutions, Inc. is an innovator of high reliability analog and mixed signal semiconductors. Leveraging core technologies, Skyworks offers diverse standard and custom linear products supporting automotive, broadband, cellular infrastructure, energy management, industrial, medical, military and mobile handset applications. The Company's portfolio includes amplifiers, attenuators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, mixers/demodulators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, receivers, switches and technical ceramics.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results and expectations of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: unprecedented uncertainty regarding global economic and financial market conditions; the susceptibility of the wireless semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; changes in laws, regulations and/or policies in the United States that could adversely affect financial markets and our ability to raise capital; our ability to develop, manufacture and

market innovative products in a highly price competitive and rapidly changing technological environment; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
