## **Skyworks Maintains Power Amplifier Module Market Leadership; Leading Research Firm Ranks Skyworks as the World's Number One PA Module Supplier in 2002**

WOBURN, Mass.--(BUSINESS WIRE)--June 6, 2003--Skyworks Solutions Inc. (Nasdaq:SWKS), the industry's leading wireless semiconductor company focused on radio frequency (RF) and complete cellular system solutions for mobile communications applications, today announced that Gartner Dataquest has named Skyworks the industry's number one power amplifier (PA) module supplier based on 2002 revenues. According to Gartner's June 2003 report "Wireless Communications Semiconductor Competitive Market Shares for 2002," Skyworks held one-third of the worldwide PA module market in 2002.

"It's clear that modules have become the power amplifier solution of choice for mobile terminals," said Klaus Buehring, Skyworks' vice president of Power Amplifier Products. "Skyworks is extremely proud to have earned the distinction of being the leading supplier of PA modules for the second year in a row and based on current design win activity we look forward to extending our lead in 2003."

Power amplifiers are a critical component in wireless handsets, determining the length of talk time and battery life available to support emerging data services, such as digital photography, Internet browsing, online shopping, video messaging and other interactive high-bandwidth applications. The company introduced its first highly integrated PA module in 1997 and has shipped more than 275 million units to date.

Skyworks has an extensive portfolio of solutions that encompass every major wireless standard including the world's smallest PA, a 3mm x 3mm CDMA module. The company manufactures its PA modules using an indium gallium phosphide (InGaP) heterojunction bipolar transistor (HBT) process that maintains high efficiency for longer handset talk and standby times, as well as excellent linearity to increase data rates.

### **About Skyworks**

Skyworks Solutions, Inc. is the industry's leading wireless semiconductor company focused on RF and complete cellular system solutions for mobile communications applications. The company began operations in June 2002, following the completion of the merger between Alpha Industries, Inc. and Conexant Systems, Inc.'s wireless communications business. Skyworks is focused on providing front-end modules, RF subsystems and cellular systems to wireless handset and infrastructure customers worldwide.

Skyworks is headquartered in Woburn, Mass., with executive offices in Irvine, Calif. The company has design, engineering, manufacturing, marketing, sales and service facilities throughout North America, Europe, Japan and Asia Pacific. ### **Safe Harbor Statement**

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry; product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including security risks, possible disruptions in transportation networks and fluctuations in foreign currency

exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's Securities and Exchange Commission filings.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
