Skyworks' Front-End Module Powers Several of Motorola's GSM/GPRS Phones; Enabling a Wide Range of Next Generation Handset Features

WOBURN, Mass.--(BUSINESS WIRE)--April 26, 2004--Skyworks Solutions, Inc. (Nasdaq:SWKS), the industry's leading wireless semiconductor company focused on radio frequency (RF) and complete cellular system solutions, today announced that Motorola has selected the company's highly integrated RF front-end transmit module (FEM) for use in a number of its innovative, next generation handset models. Skyworks' unique module architecture enables Motorola to deliver a wide variety of features ranging from integrated camera, Bluetooth wireless connectivity and downloadable games to MP3 and polyphonic ring tones, built-in speakerphones, MMS, enhanced audio and predictive text capabilities.

Motorola is leveraging Skyworks' module across its V300, V400 and V600 camera phones, which are available now worldwide. The solution is also designed into Motorola's smallest and lightest camera phone to date, the C550 model, available in Europe and Asia. Each model offers cell phone users advanced integrated cameras and other popular communication features, ranging from streaming video to photo editing and zoom capabilities.

"Motorola is one of the world's premier cellular phone brands and Skyworks is proud to be extending our engagement by providing key enabling technology for their aggressive expansion into feature-rich platforms," said Liam K. Griffin, vice president of Sales and Marketing at Skyworks. "Further, we have also expanded our base business within iDEN and CDMA applications and look forward to continued strong growth in 2005."

Skyworks' compact front-end module combines the company's industry-leading HBT power amplifier technology, GaAs PHEMT power detectors, and transmit/receive switch functions into a single low-cost laminate-based multi-chip module (MCM). The quad-band GSM/GPRS device reduces transmitter bill-of-materials costs and component count while shrinking handset board space by more than 40 percent.

About Skyworks

Skyworks Solutions, Inc. is the industry's leading wireless semiconductor company focused on RF and complete cellular system solutions for mobile communications applications. The company provides front-end modules, RF subsystems and cellular systems to handset, WLAN and infrastructure customers.

Skyworks is headquartered in Woburn, Mass., with executive offices in Irvine, Calif. The company has design, engineering, manufacturing, marketing, sales and service facilities throughout North America, Europe, Japan, Korea, Taiwan and India. For more information please visit www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry; product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including health and security risks, possible disruptions in transportation networks and fluctuations in foreign

currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's Securities and Exchange Commission filings.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
