Skyworks Ramping Production of High Performance Receive Downconverters for Several Top-Tier Infrastructure OEMs

Portfolio Supporting GSM / WCDMA / WiMAX and LTE Applications

WOBURN, Mass.--(BUSINESS WIRE)--Oct. 15, 2007--Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity, today announced that several of its single channel and diversity downconverters, including the SKY73032 and the SKY73021, have reached volume production with the industry's leading infrastructure OEMs. Skyworks' highly integrated solutions, which are a part of its rapidly growing Linear Products portfolio, support GSM/EDGE, CDMA, WCDMA, WiMAX, and Long Term Evolution (LTE) applications, offer a wide range of RF frequencies, and leverage the same innovative transceiver technology Skyworks has developed for handsets.

"After capturing multiple design wins, we are delighted to have reached volume production with several of our products," said Stan Swearingen, Skyworks' vice president and general manager of Linear Products. "Our expansive portfolio supports infrastructure OEMs at any stage, from those implementing system upgrades to those developing next-generation designs, essentially providing customers with the ability to meet all their high performance downconverter needs with one supplier."

Growth in the wireless infrastructure market is expected to be fueled by capital expenditures for emerging regions and the build out of 3G networks required to handle the migration to WCDMA, where handsets and base stations must process voice and data simultaneously. According to CIBC estimates, capital expenditures for 3G alone are anticipated to be over \$23 billion in 2008, representing a compounded annual growth rate of 17 percent from 2006.

The company's expanded infrastructure portfolio includes high-performance receiver front-ends, down-converters, linear power amplifiers and drivers, as well as all of the necessary RF microwave discrete and passive components. Each component covers a wide range of frequencies, also making them ideal for satellite transceivers, wireless routers, wireless local loop, image storage modules, telemetry, RF identification (RFID), and other global wireless applications.

Today, Skyworks is in volume production with the following downconverters, having shipped over one million units since their introduction a year ago:

[SKY73020](#): a 700-1000 MHz diversity mixer

[SKY73021](#): a 1700-2200 MHz diversity mixer

[SKY73022](#): a 700-1000 MHz high gain diversity mixer

[SKY73023](#): a 700-2200 MHz high gain diversity mixer

[SKY73025](#): a 2200-2700 MHz high gain diversity mixer

[SKY73032](#): a 700-1000 MHz high gain single mixer

[SKY73033](#): a 1700-2200 MHz high gain single mixer

[SKY73035](#): a 2200-2700 MHz high gain single mixer

About Skyworks

Skyworks Solutions, Inc. is an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity. The company's power amplifiers, front-end modules and direct conversion radios are at the heart of many of today's leading-edge multimedia handsets. Leveraging core technologies, Skyworks also offers a diverse portfolio of linear products that support automotive, broadband, cellular infrastructure, industrial and medical applications.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results and expectations of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by our, and our customers', products; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; our reliance on a several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; and the uncertainties of litigation, including disputes over intellectual property, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
