Skyworks Powers Huawei's Next Generation Smartphones

World's Third Largest OEM Leveraging 10 Skyworks Devices Including the Low, Mid and High Band Architectures of the SkyOne® Ultra 2.0 with SkyBlue™ Enabling Technology; Solutions Solve LTE Advanced Carrier Aggregation Challenges

WOBURN, Mass.--(BUSINESS WIRE)-- **Skyworks Solutions, Inc. (NASDAQ: SWKS)**, an innovator of high performance analog semiconductors connecting people, places and things, today announced that Huawei's newest flagship P9 and P9 Plus smartphones are being enabled by a broad suite of Skyworks devices ranging from highly integrated modules to industry-leading analog control ICs. Specifically, Huawei's latest mobile platforms are utilizing the low, mid, and high band architectures of the SkyOne® Ultra 2.0 featuring integrated filters and SkyBlue™ technology, antenna tuners, power management devices and multi-throw switches. Skyworks' products address LTE advanced carrier aggregation standards and support up to nine global combinations, including the two most challenging mid-band/mid-band cases. To view a teardown of the P9 smartphone from ABI Research, please click [here](#).

"Huawei's adoption of multiple solutions from our broad portfolio further solidifies Skyworks leadership position with the world's leading smartphone providers," said Carlos Bori, vice president of sales and marketing for Skyworks. "Given our systems expertise and innovative designs, Skyworks is able to offer customers highly configurable and customized architectures that reduce complexity and deliver unparalleled performance. We are adeptly addressing carrier aggregation challenges and increasing frequency bands, while minimizing board size and optimizing battery life to provide competitive advantages and reduced time to market."

"By leveraging Skyworks' analog and RF expertise, Huawei is pleased to be offering P9 users one of the highest consumer experiences with smartphones," said Huawei. "Skyworks' advanced solutions are enabling unrivaled new features in the P9 and P9 Plus including a virtual triple-antenna architecture designed for consumers who need robust and seamless connectivity to cellular and Wi-Fi networks, allowing them to fully harness the power of the mobile Internet no matter where they are in the world."

According to a forecast by GfK, China smartphone demand in 2016 is stronger than expected and could reach 442 million units, an increase of seven percent when compared to last year. In 2012, Huawei became the world's third largest smartphone manufacturer and in 2015 was the first Chinese company to sell more than 100 million mobile phones in one year.

About Skyworks' Broad Product Portfolio

The following solutions are powering Huawei's P9 and P9 Plus platforms:

- | **SkyOne® Ultra 2.0** - a highly integrated single SKU LTE platform with flexible antenna support and a baseband agnostic interface which contains the company's revolutionary SkyBlue™ technology for best in class power efficiencies and linear power capability:
 - [SKY78113](#) - Low Band 3G/4G Tx-Rx SkyOne® Module
 - [SKY78114](#) - Mid Band 3G/4G Tx-Rx SkyOne® Module
 - [SKY78117](#) - High Band 3G/4G Tx-Rx SkyOne® Module
- | [SKY77360-12](#) - 2G Power Amplifier Module
- | [SKY87020-11](#) - RF Front-end Power Management IC
- | [SKY19003](#) - Antenna Tuner
- | [SKY19225](#) - Antenna Tuner
- | [SKY13351](#) - Wi-Fi Single Pole, Double Throw Switch
- | [SKY13552](#) - Double Pole 12 Throw Switch
- | [SKY13598](#) - High Isolation Antenna Swap Switch

About Huawei's Consumer Business Group

Huawei's products and services are available in more than 170 countries and are used by a third of the world's population, ranking third in the world in mobile phone shipments in 2014. Sixteen R&D centers have been set up in the United States, Germany, Sweden, Russia, India, and China. Huawei Consumer Business Group is one of Huawei's three business units and covers smartphones, mobile broadband devices, home devices and cloud services. Huawei's global network is built on 20 years of expertise in the telecom industry and is dedicated to delivering the latest technological advances to consumers around the world. About Skyworks

Skyworks Solutions, Inc. is empowering the wireless networking revolution. Our highly innovative analog semiconductors are connecting people, places, and things, spanning a number of new and previously unimagined applications within the automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearable markets.

Headquartered in Woburn, Massachusetts, Skyworks is a global company with engineering, marketing, operations, sales, and service facilities located throughout Asia, Europe and North America. For more information, please visit Skyworks' website at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include without limitation information relating to future results and expectations of Skyworks (e.g., certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," or "continue," and similar expressions and variations or negatives of these words. All such statements are subject to certain risks, uncertainties and other important factors that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks, uncertainties and other important factors include, but are not limited to: uncertainty regarding global economic and financial market conditions; the susceptibility of the semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the availability and pricing of third-party semiconductor foundry, assembly and test capacity, raw materials and supplier components; changes in laws, regulations and/or policies that could adversely affect either (i) the economy and our customers' demand for our products or (ii) the financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; economic, social, military and geo-political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third-party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter-than-expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including, but not limited to, those detailed from time to time in our filings with the Securities and Exchange Commission.

The forward-looking statements contained in this news release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
