Skyworks Captures Additional Design Wins with Helios EDGE RF Subsystem; Quanta to Launch Skyworks-Based EDGE Products Early Next Year

WOBURN, Mass.--(BUSINESS WIRE)--June 8, 2004--Skyworks Solutions, Inc. (Nasdaq:SWKS), the industry's leading wireless semiconductor company focused on radio frequency (RF) and complete cellular system solutions for mobile communications applications, today announced that Quanta Computer Inc., will leverage Skyworks' Helios™ EDGE-based RF subsystem to launch new products that will be available early 2005.

Quanta, based in Taiwan, is an original development manufacturer (ODM) to top-tier handset suppliers worldwide. Quanta plans to introduce a number of new handsets with advanced features of varying complexity such as color displays, integrated digital cameras, Web browsing and multimedia messaging services (MMS).

"As a high volume supplier of field-proven GPRS PA modules and direct conversion transceivers to Quanta over the years, Skyworks is our natural choice as we aggressively migrate to EDGE platforms," said Georges Boulloy, senior vice president and general manager of Quanta's Wireless Business Unit. "Helios™ highlights Skyworks' unique ability to pair field-proven front-end module technology with radio functionality -- simplifying our RF architecture, improving power efficiency, reducing component count and lowering our overall bill of materials. While most RF component suppliers only promise this level of integration, Skyworks is delivering today."

"We are delighted to extend our existing relationship with Quanta into EDGE applications," said Mohy Abdelgany, vice president and business director, RF Solutions, at Skyworks. "We look forward to successful ramps at Quanta, as well as at a number of other leading OEMs and ODMs, as they introduce leading-edge handsets based on our Helios™ solution over the coming months."

According to a recent study published by Visant Strategies, the total number of EDGE users is expected to surpass 130 million within five years. Meanwhile, the chipset market for EDGE components in wireless handsets is expected to approach \$2 billion by 2009, with more than \$31 billion worth of GSM/GPRS/EDGE-enabled handsets sold worldwide.

About Helios™

Skyworks' complete RF subsystem for E-GPRS (GSM/GPRS/EDGE) mobile handsets includes the company's leadership single-chip direct conversion transceiver, power amplifier (PA) module and a PA controller/modulator. Helios™ utilizes the company's patent-pending Polar Loop™ transmit modulation technology, which eliminates expensive components such as SAW filters, and saves handset designers significant space, cost and design-cycle time with improved performance. This approach has the potential to enhance PA efficiency in EDGE mode by up to 10 percent when compared to conventional architectures, resulting in improved talk times.

About Skyworks

Skyworks Solutions, Inc. is the industry's leading wireless semiconductor company focused on RF and complete cellular system solutions for mobile communications applications. The company provides front-end modules, RF subsystems and cellular systems to handset, WLAN and infrastructure customers.

Skyworks is headquartered in Woburn, Mass., with executive offices in Irvine, Calif. The company has design, engineering, manufacturing, marketing, sales and service facilities throughout North America, Europe, Japan, China, Korea, Taiwan and India. Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash

flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry; product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including health and security risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's Securities and Exchange Commission filings.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
