Skyworks Supports Samsung's Ultra-Slim Trace™ Phone: Thinnest Bar Phone Available in the United States

Helios™ II EDGE Radio Powers Quad-Band, Feature-Rich and Fashionable Phone

WOBURN, Mass.--(BUSINESS WIRE)--Nov. 29, 2006--Skyworks Solutions, Inc. (NASDAQ: SWKS), an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity, today announced that its Helios™ II EDGE radio is supporting Samsung's Trace™ t519 handset, a high-speed connectivity mobile phone sold exclusively by T-Mobile.

Since the Helios™ architecture effectively cuts the radio frequency (RF) board space in half, the Trace™ comes packed with multimedia features including Bluetooth®, an MP3 player, a built-in 1.3 megapixel camera with video capture technology, and an external memory slot -- all within a handset just .33" thick. A wide-screen and landscape-oriented display make viewing messages, photos and videos a user-friendly experience.

"Skyworks is proud to provide Samsung with the advanced radio designs it needs to enable innovative and stylish phones such as the t519," said Brian M. Daly, vice president of marketing at Skyworks. "Trace™ is just one of several handsets Skyworks is powering for Samsung. Given our ability to deliver unparalleled levels of RF integration, we are supporting Samsung and others as they produce the ultra-thin phones that today's consumers have more than come to expect."

Trace™ is the latest in a series of phones powered by Helios™. Skyworks EDGE radio shipments have increased substantially over the past year with volume shipments growing to over five million units in the most recent quarter, up from approximately 100,000 units a year ago. The world's leading handset manufacturers rely on Helios™ high performance, cost-effective power efficient architecture with the flexibility to interface with a wide variety of baseband processors.

About Skyworks

Skyworks Solutions, Inc. is an innovator of high performance analog and mixed signal semiconductors enabling mobile connectivity. The company's power amplifiers, front-end modules and direct conversion transceivers are at the heart of many of today's leading-edge multimedia handsets. Leveraging core technologies, Skyworks also offers a diverse portfolio of linear products that support automotive, broadband, cellular infrastructure, industrial and medical applications.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks' Web site at www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results and expectations of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by our, and our customers', products; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; our ability to rapidly develop new products and avoid product obsolescence; our ability to

retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; our reliance on a several key customers for a large percentage of our sales; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; and the uncertainties of litigation, including disputes over intellectual property, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
