Skyworks Receives Data and Integration Mastery Award from Managing Automation Magazine; Company Recognized For Business and Technological Expertise In Manufacturing Process

WOBURN, Mass., Mar 16, 2005 (BUSINESS WIRE) -- Skyworks Solutions, Inc. (NASDAQ:SWKS), a global leader in analog, mixed signal and digital semiconductors for mobile communications applications, today announced it has received Managing Automation's first-annual Progressive Manufacturing Award, which recognizes companies in seven categories of manufacturing excellence and innovation. Skyworks will receive its award for Data and Integration Mastery at the magazine's Progressive Manufacturing Summit and Awards Conference gala event being held on March 17 in New Orleans.

"Skyworks is extremely honored to be acknowledged by such an esteemed panel of industry manufacturing experts and alongside such a highly regarded peer group," said Louw Kotze, vice president of information technology at Skyworks. "This award exemplifies Skyworks' commitment to information technology solutions that achieve manufacturing excellence, improve customer and supplier intimacy and simplify operations, while increasing profitability."

In recognizing Skyworks, Managing Automation magazine's expert judging panel commended the company for solving critical integration challenges following its 2002 creation from the merger of Alpha Industries and Conexant Systems' wireless division. Skyworks successfully implemented an interim order-management "Simplification Initiative" within six weeks that improved customer support, which was followed by a complete standards-based enterprise resource planning (ERP) platform merger within 18 months, resulting in \$1.2 million in savings. The judging panel noted that these accomplishments set the tone for a seamless merger, including both revenue growth and achieving profitability within the first year.

The Data and Integration Mastery award recognizes achievement in cross-functional systems/process integration between design, production and logistics/warehousing or other functions. The Progressive Manufacturing Summit and Awards Conference focuses on critical transformations that manufacturers must achieve to sustain a global competitive advantage.

Kristofor Williams, program manager of electronic commerce for Skyworks, will be an expert panelist for the "Integration Imperative: Breaking Down Functional Silos" session at the Progressive Manufacturing Summit taking place at the Ritz Carlton New Orleans on Thursday, March 17, 2005, at 4:30 p.m. CST.

About Skyworks

Skyworks Solutions, Inc. is a global leader in analog, mixed signal and digital semiconductors for mobile communications applications. The company's power amplifiers, front-end modules, direct conversion transceivers and complete system solutions are at the heart of many of today's leading-edge multimedia handsets, cellular base stations and wireless networking platforms. Skyworks also offers a portfolio of highly innovative linear products, supporting a diverse set of automotive, broadband, industrial and medical customers.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit the Skyworks Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry;

product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
