Skyworks and Motorola to Jointly Develop TETRA-Based Power Amplifiers for Public Safety and Security Applications; Multi-Year Business Development Deal Expands Relationship Beyond Handsets

WOBURN, Mass.--(BUSINESS WIRE)--Sept. 27, 2005--Skyworks Solutions, Inc. (NASDAQ:SWKS), a global leader in analog, mixed signal and digital semiconductors for mobile applications, today announced that it has signed an exclusive agreement with Motorola, Inc. (NYSE:MOT) to jointly develop Terrestrial Trunked Radio (TETRA)-based power amplifiers. The custom solution will be leveraged in Motorola's two-way radio platforms designed to meet the stringent requirements of public safety, government and enterprise customers worldwide. TETRA is Europe's open digital radio frequency (RF) standard defined by the European Telecommunications Standards Institute and has been adopted by other countries in Asia and South America.

"We are delighted to be working with Motorola on the development of solutions that aid in public safety and security applications," said Sean Martin, senior director of marketing for Linear Products at Skyworks. "Our agreement highlights how Skyworks is leveraging its core analog technologies and capabilities to help customers develop linear products for a wide variety of applications."

In 2004, Skyworks launched the Linear Products business unit whose charter is to aggressively leverage the company's core analog product portfolio and modeling capabilities, along with its strong catalog sales channels and specialized rep and distributor networks, in non-handset applications. Thus far, Skyworks has secured several strategic design wins in the medical, broadband, automotive and industrial markets.

Skyworks is a key supplier to Motorola, delivering innovative front-end modules that are at the heart of many of Motorola's GPRS cellular phones, including the popular RAZR model.

About Motorola

Motorola (NYSE:MOT) is a Fortune 100 global communications leader that provides seamless mobility products and solutions across broadband, embedded systems and wireless networks. In your home, auto, workplace and all spaces in between, seamless mobility means you can reach the people, things and information you need on the go. Seamless mobility harnesses the power of technology convergence and enables smarter, faster, cost-effective and flexible communication. Motorola had sales of US \$31.3 billion in 2004. About Skyworks

Skyworks Solutions, Inc. is a global leader in analog, mixed signal and digital semiconductors for mobile communications applications. The company's power amplifiers, front-end modules, direct conversion transceivers and complete system solutions are at the heart of many of today's leading-edge multimedia handsets, cellular base stations and wireless networking platforms. Skyworks also offers a portfolio of highly innovative linear products, supporting a diverse set of automotive, broadband, industrial and medical customers.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit the Skyworks Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and

market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry; product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
