Skyworks Introduces the World's Most Highly Integrated 6mm x 6mm GSM/GPRS Power Amplifier Module

Small, Thin PA Module Supports Worldwide GSM Handset Operation

WOBURN, Mass., Aug 4, 2003 (BUSINESS WIRE) -- Skyworks Solutions, Inc. (Nasdaq:SWKS), the industry's leading wireless semiconductor company focused on radio frequency (RF) and complete cellular system solutions for mobile communications applications, today expanded its family of industry-leading power amplifier (PA) modules with a 6mm x 6mm x 1.2mm module for tri-band GSM/GPRS cellular handsets around the world.

"The [SKY77321](#) represents the latest in our line of high performance GSM power amplifiers and is the world's most highly integrated PA module under 40-square millimeters," said Klaus Buehring, vice president of Power Amplifier Products at Skyworks. "With the device's small footprint and high level of integration, handset manufacturers will easily recognize a significant savings in board space and design time."

The [SKY77321](#) provides handset manufacturers with a single-component solution for GSM phones, regardless of geographic region or frequency band. The module consists of an EGSM900, DCS1800 and PCS1900 PA block, and 50-ohm fully matched input/output ports to reduce the number of external components required for a tri-band design. It also supports Class 12 GPRS multi-slot operation. Skyworks' devices are based on a 50 GHz gallium arsenide (GaAs) heterojunction bipolar transistor (HBT) process technology and support GSM handset operation in more than 180 countries.

Skyworks is the industry leader in PA module technology and has an extensive portfolio of solutions that encompass every major wireless standard. According to Gartner Dataquest's June 2003 report "Wireless Communications Semiconductor Competitive Market Shares for 2002," Skyworks held one-third of the worldwide PA module market in 2002.

Pricing and Availability

Skyworks' [SKY77321](#) power amplifier module is available now. Modules are priced at \$2.75 in quantities of 10,000.

Note to editors: Technical documentation and photos are available upon request.

About Skyworks

Skyworks Solutions, Inc. is the industry's leading wireless semiconductor company focused on RF and complete cellular system solutions for mobile communications applications. The company is focused on providing front-end modules, RF subsystems and cellular systems to handset, WLAN and infrastructure customers.

Skyworks is headquartered in Woburn, Mass., with executive offices in Irvine, Calif. The company has design, engineering, manufacturing, marketing, sales and service facilities throughout North America, Europe, Japan and Asia Pacific. For more information please visit www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry;

product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including security risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's Securities and Exchange Commission filings.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
