Skyworks Supports Samsung's Newest GPRS, EDGE and 3G Handsets

Partners with Qualcomm, Broadcom, Infineon, NXP and Other Baseband Suppliers

WOBURN, Mass.--(BUSINESS WIRE)--Feb. 9, 2009-- Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high reliability analog and mixed signal semiconductors enabling a broad range of end markets, today announced that Samsung is leveraging its front-end modules (FEM) and power amplifiers (PA) in its innovative general packet radio service (GPRS), enhanced data GSM management (EDGE), and third generation (3G) – in particular its universal mobile telecommunications system (UMTS) – models. Skyworks is partnering with baseband suppliers such as Qualcomm, Broadcom, Infineon and NXP to provide highly integrated front-end solutions for tier-one mobile handset manufacturers such as Samsung.

Samsung is utilizing Skyworks' FEMs and PAs in their latest B3030, B320 and S7330 models. Optimized features include Bluetooth, USB, Web browsing, camera, gaming and messaging functionality – included in ultra compact devices with impressive talk times up to seven hours.

“Skyworks is pleased to be an integral part of Samsung’s compelling new lineup of GPRS, EDGE and 3G handsets as we continue to partner with a broader set of baseband suppliers,” said Liam K. Griffin, Skyworks’ senior vice president of sales and marketing. “Our front-end module and power amplifier participation in their newest models is a reflection of yet another multimode design-win and increasing market share gains at Samsung and other OEMs.”

About Skyworks’ FEMs and PAs

- The SKY77170 PA module for wideband code division multiple access (WCDMA) is a fully matched 10-pad surface mount module that covers the full 1920-1980 megahertz (MHz) bandwidth and meets the stringent spectral linearity requirements of high-speed downlink packet access (HSDPA) data transmission with high power-added efficiency (PAE) for up to 27 dBm output.
- The SKY77336 PA module for quad-band global system for mobile communications (GSM)/GPRS is designed in a compact form factor for cellular handsets supporting gaussian minimum-shift keying (GMSK) and polar EDGE modulation.
- The SKY77344 PA module for quad-band GSM and EDGE is designed in a compact form factor for cellular handsets supporting GMSK and linear EDGE modulation.
- The SKY77519 transmit-receive (Tx-RX) FEM for quad-band GSM/GPRS/EDGE-single band WCDMA antenna switch support contains a very low profile and EDGE polar modulation.
- The SKY77531 Tx-Rx integrated phase and amplitude controller (iPAC)[™] quadband FEM for GSM/GPRS also contains a low profile compact form factor.
- The SKY77534 Tx-Rx iPAC dual-band GSM/GPRS FEM is designed in a low profile, compact form factor and offers a complete transmit voltage-controlled oscillator (VCO)-to-antenna and antenna-to-receive surface acoustic wave (SAW) filter solution.

These modules are manufactured using lead (Pb)-free, restriction of hazardous substances (RoHS) compliant packaging.

About Skyworks

Skyworks Solutions, Inc. is an innovator of high reliability analog and mixed signal semiconductors. Leveraging core technologies, Skyworks offers diverse standard and custom linear products supporting automotive, broadband, cellular infrastructure, energy management, industrial, medical, military and mobile handset applications. The Company’s portfolio includes amplifiers, attenuators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, mixers/demodulators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, receivers, switches and technical ceramics.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit Skyworks’ Web site at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the

Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results and expectations of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: unprecedented uncertainty regarding global economic and financial market conditions; the susceptibility of the wireless semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; changes in laws, regulations and/or policies in the United States that could adversely affect financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; economic, social and political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; the availability and pricing of third party semiconductor foundry, assembly and test capacity and raw materials; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter than expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including but not limited to those detailed from time to time in our filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
