

Skyworks Expands Antenna Tuning Portfolio

Advanced Aperture Tuners Optimize Antenna Efficiency and Performance Across a Broader Range of Smartphones

WOBURN, Mass.--(BUSINESS WIRE)-- **Skyworks Solutions, Inc. (NASDAQ: SWKS)**, an innovator of high performance analog semiconductors connecting people, places and things, today expanded its best-in-class antenna tuning product portfolio with the addition of several new high performance solutions. Skyworks' latest antenna tuning offerings address the design challenges mobile device manufacturers face as smartphones become thinner, leverage revolutionary case materials and integrate more cellular bands. By optimizing radiated efficiency, Skyworks' antenna aperture tuners enable higher data throughput and smaller footprints, minimizing dropped calls and improving the consumer experience.

common footprint of these devices allows customers to utilize one layout across multiple designs.

These new devices are available in the following configurations:

- | SP2T - [SKY19243-686LF](#)
- | SP3T - [SKY19244-686LF](#)
- | SP4T - [SKY19245-686LF](#)

"Cellular band proliferation in smartphones increases complexity and requires highly sophisticated RF solutions," said David Stasey, general manager and vice president of Diversified Analog Solutions at Skyworks. "With our newest suite of antenna tuners, Skyworks is once again pushing the performance envelope and enabling breakthrough front-end performance as well as size reductions and cost savings."

About Skyworks' Family of Antenna Tuning Solutions

Skyworks' new antenna tuning switches provide low R_{on} for higher efficiency, transfer more power to the antenna, offer low C_{off} to deliver accurate and consistent tuning results, enable high V_{peak} for improved radiated spurious emission (RSE) performance and integrate GPIO-control for ease of use. To simplify the design process and accelerate time-to-market, Skyworks assists with antenna modeling, data simulation, design and layout optimization, and onsite support to help customers leverage these advanced antenna tuning products into their platforms. These products are shipped in a RoHS compliant plastic package with compact 10 pin 1.1 x 1.5 x 0.5 mm quad-flat no-leads (QFN). The

Pricing and Availability

Skyworks' new antenna aperture tuners are currently available for sampling and production. For additional information about these and other Skyworks antenna tuning solutions, please visit [Skyworks Antenna Tuning Switches](#) or contact sales@skyworksinc.com.

About Skyworks

Skyworks Solutions, Inc. is empowering the wireless networking revolution. Our highly innovative analog semiconductors are connecting people, places and things spanning a number of new and previously unimagined applications within the automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearable markets.

Headquartered in Woburn, Massachusetts, Skyworks is a global company with engineering, marketing, operations, sales, and service facilities located throughout Asia, Europe and North America. For more information, please visit Skyworks' website at: www.skyworksinc.com.

Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include without limitation information relating to future results and expectations of Skyworks (e.g., certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," or "continue," and similar expressions and variations or negatives of these words. All such statements are subject to certain risks, uncertainties and other important factors that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks, uncertainties and other important factors include, but are not limited to: uncertainty regarding global economic and financial market conditions; the susceptibility of the semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the availability and pricing of third-party semiconductor foundry, assembly and test capacity, raw materials and supplier components; changes in laws, regulations and/or policies that could adversely affect either (i) the economy and our customers' demand for our products or (ii) the financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; economic, social, military and geo-political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third-party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter-than-expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including, but not limited to, those detailed from time to time in our filings with the Securities and Exchange Commission.

The forward-looking statements contained in this news release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
