## **Skyworks Captures an Increasing Number of GSM/GPRS PA Module Sockets at Samsung; Initially Designed Into More Than A Dozen New Handsets**

WOBURN, Mass--(BUSINESS WIRE)--March 23, 2004--Skyworks Solutions Inc. (Nasdaq:SWKS), the industry's leading wireless semiconductor company focused on radio frequency (RF) and complete cellular system solutions for mobile communications applications, today announced the company's iPAC™ power amplifier (PA) module has been integrated into multiple, new, feature-rich handsets being shipped by Samsung Electronics worldwide.

The iPAC PA is the world's smallest module with integrated power control based on a current-sensing method, which has been proven by industry leaders to be the most power-efficient means of controlling cellular phone transmission signals. Packaged in a low profile, compact 6mm x 8mm module, the SKY77324 provides handset manufacturers with a single-component solution for GSM/GPRS phones, regardless of geographic region or frequency band.

Samsung's SGH-P107 GSM/GPRS handset, an initial Skyworks iPAC-enabled platform within a competing baseband architecture, features a built-in rotating camera, a high-resolution color LCD screen, 40 polyphonic ring tone melodies, MMS services and built-in games. Over the coming months, Samsung will introduce a dozen new models incorporating Skyworks' PA modules.

"We are delighted to have met Samsung's stringent performance requirements and to be extending our PA module presence from leadership in CDMA to now supporting GSM/GPRS. This expanded customer engagement represents a significant incremental revenue opportunity for Skyworks," said Kevin Barber, senior vice president and general manager of RF Solutions at Skyworks. "At the same time, these design wins best illustrate our increasing traction at Samsung as we leverage our complete system solution leadership position to now offer a clear migration path to GSM/GPRS front-end modules, direct conversion transceivers and Single Package Radio implementations."

### About Skyworks

Skyworks Solutions, Inc. is the industry's leading wireless semiconductor company focused on RF and complete cellular system solutions for mobile communications applications. The company provides front-end modules, RF subsystems and cellular systems to handset, WLAN and infrastructure customers.

Skyworks is headquartered in Woburn, Mass., with executive offices in Irvine, Calif. The company has design, engineering, manufacturing, marketing, sales and service throughout North America, Europe, Japan, Korea, Taiwan and India. ### Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry; product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including health and security risks, possible disruptions in transportation networks and fluctuations in foreign

currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's Securities and Exchange Commission filings.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.

Note to Editors: Skyworks is a trademark or registered trademark of Skyworks Solutions, Inc. or its subsidiaries in the U.S. and in other countries. All other brands and names listed are trademarks of their respective companies.
