## Skyworks Enabling Next Generation Over-the-Top Set Top Boxes

*Delivering System Solutions for Streaming Media Platforms That Are Transforming Consumer Viewing*

WOBURN, Mass.--(BUSINESS WIRE)-- Skyworks Solutions, Inc. (NASDAQ:SWKS), an innovator of high performance analog semiconductors connecting people, places and things, today announced that it is ramping front-end modules, wireless connectivity switches, power amplifiers, low noise amplifiers, and power management solutions for streaming media and smart TV applications supporting OEMs such as Roku, Google, Amazon and Samsung. Over-the-top (OTT) content provided through set top boxes is one of the fastest growing media segments as consumers migrate towards high-end streaming solutions across multiple devices. Skyworks' highly innovative products deliver best-in-class WiFi media performance and support ultra-high definition/4K resolution.

"Skyworks' analog and RF solutions are being leveraged across multiple next generation platforms consumers are embracing to stream content throughout the home," said John O'Neill, vice president of broad markets for Skyworks. "Our design win momentum demonstrates how we are leveraging our expansive portfolio and deep product pipeline to capitalize on the demand for system level solutions enabling wireless connectivity in new markets and ecosystems."

According to Barbara Kraus, Director of Research at Parks Associates, nearly 50 percent of video content that U.S. consumers watch on a television is on demand or time shifted. This is up from 38 percent in 2010, reflecting the rapidly changing market and move towards new digital media. In fact, a recent report from Pricewaterhouse Coopers states that OTT television streaming will grow to be a \$10.1 billion segment in 2018, up from just \$3.3 billion in 2013.

### About Skyworks' Solutions for Over-the-Top Platforms

[SE2433T](#) - a high performance power amplifier optimized for ZigBee® and 802.15.4 applications. The amplifier is designed for ease of use and maximum flexibility with an integrated input match and a digital enable control.

[SE2577L](#) - a dual-band, 802.11ac WLAN RF front-end module that provides the functionality of transmit/receive switches, duplex isolation filters, as well as harmonic and spurious rejection filters.

[SKY85203-11](#) - a 2.4 GHz, 802.11ac front-end solution that integrates a single-pole, triple-throw (SP3T) switch and low-noise amplifier with a bypass mode.

[SKY85711-21](#) - a 5 GHz front-end module incorporating a single-pole, double-throw transmit/receive switch, a low-noise amplifier with bypass, and a power amplifier.

[AAT1153](#) - a 1.2MHz constant frequency, current mode, pulse width modulation step-down converter that is ideal for equipment requiring very high current (up to 2A) while still achieving over 90 percent efficiency during peak load conditions.

### About Skyworks

Skyworks Solutions, Inc. is empowering the wireless networking revolution. Our highly innovative analog semiconductors are connecting people, places and things spanning a number of new and previously unimagined applications within the automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearable markets.

Headquartered in Woburn, Massachusetts, Skyworks is a global company with engineering, marketing, operations, sales, and service facilities located throughout Asia, Europe and North America. For more information, please visit Skyworks' website at: [www.skyworksinc.com](http://www.skyworksinc.com).

### Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include without limitation information relating to future results and expectations of Skyworks (e.g., certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will," or "continue," and similar expressions and variations or negatives of these words. All such statements are subject to certain risks,

uncertainties and other important factors that could cause actual results to differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks, uncertainties and other important factors include, but are not limited to: uncertainty regarding global economic and financial market conditions; the susceptibility of the semiconductor industry and the markets addressed by our, and our customers', products to economic downturns; the timing, rescheduling or cancellation of significant customer orders and our ability, as well as the ability of our customers, to manage inventory; losses or curtailments of purchases or payments from key customers, or the timing of customer inventory adjustments; the availability and pricing of third-party semiconductor foundry, assembly and test capacity, raw materials and supplier components; changes in laws, regulations and/or policies that could adversely affect either (i) the economy and our customers' demand for our products or (ii) the financial markets and our ability to raise capital; our ability to develop, manufacture and market innovative products in a highly price competitive and rapidly changing technological environment; economic, social, military and geo-political conditions in the countries in which we, our customers or our suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; fluctuations in our manufacturing yields due to our complex and specialized manufacturing processes; delays or disruptions in production due to equipment maintenance, repairs and/or upgrades; our reliance on several key customers for a large percentage of our sales; fluctuations in the manufacturing yields of our third-party semiconductor foundries and other problems or delays in the fabrication, assembly, testing or delivery of our products; our ability to timely and accurately predict market requirements and evolving industry standards, and to identify opportunities in new markets; uncertainties of litigation, including potential disputes over intellectual property infringement and rights, as well as payments related to the licensing and/or sale of such rights; our ability to rapidly develop new products and avoid product obsolescence; our ability to retain, recruit and hire key executives, technical personnel and other employees in the positions and numbers, with the experience and capabilities, and at the compensation levels needed to implement our business and product plans; lengthy product development cycles that impact the timing of new product introductions; unfavorable changes in product mix; the quality of our products and any remediation costs; shorter-than-expected product life cycles; problems or delays that we may face in shifting our products to smaller geometry process technologies and in achieving higher levels of design integration; and our ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties, as well as other risks and uncertainties, including, but not limited to, those detailed from time to time in our filings with the Securities and Exchange Commission.

The forward-looking statements contained in this news release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
