## **Skyworks Commences High-Volume Shipments of World's Smallest and Lowest-Cost Radio System to LG Electronics; Highly Integrated Solution Enables Economic Development and Growth in Emerging Markets**

WOBURN, Mass.--(BUSINESS WIRE)--Dec. 8, 2005--

Skyworks Radios Now Incorporated at 4 of 5 Leading OEMs

Skyworks Solutions, Inc. (NASDAQ:SWKS), an industry leader in radio solutions and precision analog semiconductors, today announced it has commenced volume shipments of its GSM/GPRS radio system to LG Electronics. LG, a top-tier handset manufacturer, is leveraging the SKY74400, a low-cost silicon platform that incorporates advanced manufacturing techniques to shrink the footprint and reduce customers' bill of materials, in handsets being developed for emerging markets.

Skyworks' GSM/GPRS solution combines its field-proven silicon transceiver with its industry-leading power amplifier (PA) into one ultra-compact architecture, replacing discrete designs that make use of a direct conversion transceiver, a separate PA and various other external components.

In emerging markets, consumers and operators demand inexpensive handsets that meet specific requirements while exceeding expectations for quality, reliability and design. As the primary obstacle to wider adoption in developing countries is cost, Skyworks' radio addresses this issue by providing top-tier OEMs a cost-effective, high-performance solution, thus helping boost economic development in many emerging markets such as Africa, India, and Southeast Asia.

According to ABI Research, up to 80 percent of the world's population lives within range of a cellular network, however, only 25 percent subscribe to a mobile phone service. Industry observers believe low-cost handsets could expand the market by as many as 3 billion customers.

"Skyworks is pleased to be doing its part in bringing low-cost handsets to emerging markets," said Kevin D. Barber, senior vice president and general manager for Mobile Platforms at Skyworks. "Our architecture makes it easy for customers to design in and provides significant cost benefits in engineering development, logistics and manufacturing, enabling OEMs to meet growing demands in this high-volume market. Additionally, this development highlights our ability to bring radio solutions to tier-one OEMs."

Through its innovative and proprietary technology, Skyworks is providing radio solutions to four of the top five leading OEMs and executing on its strategy of delivering higher levels of integration to handset manufacturers. The migration of customers from power amplifiers to front-end modules, to complete radio solutions allows for smaller RF footprints and reduced bill of materials, while at the same time enabling Skyworks to significantly increase its addressable market - a true win-win approach.

### About Skyworks

Skyworks Solutions, Inc. is an industry leader in radio solutions and precision analog semiconductors servicing a diversified set of mobile communications applications. The company's power amplifiers, front end modules and direct conversion transceivers are at the heart of many of today's leading-edge multimedia handsets, cellular base stations and wireless networking platforms. Skyworks also offers a portfolio of highly innovative linear products, supporting a diverse set of automotive, broadband, industrial and medical customers.

Headquartered in Woburn, Mass., Skyworks is worldwide with engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. For more information, please visit the Skyworks Web site at: [www.skyworksinc.com](http://www.skyworksinc.com).

### Safe Harbor Statement

This news release includes "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include information relating to future results of Skyworks (including certain projections and business trends). Forward-looking statements can often be identified by words such as "anticipates," "expects," "intends," "believes," "plans," "may," "will," "continue," similar expressions, and variations or negatives of these words. All such statements are subject to certain risks and uncertainties that could cause actual results to

differ materially and adversely from those projected, and may affect our future operating results, financial position and cash flows.

These risks and uncertainties include, but are not limited to: global economic and market conditions, such as the cyclical nature of the semiconductor industry and the markets addressed by the company's and its customers' products; demand for and market acceptance of new and existing products; the ability to develop, manufacture and market innovative products in a rapidly changing technological environment; the ability to compete with products and prices in an intensely competitive industry; product obsolescence; losses or curtailments of purchases from key customers or the timing of customer inventory adjustments; the timing of new product introductions; the availability and extent of utilization of raw materials, critical manufacturing equipment and manufacturing capacity; pricing pressures and other competitive factors; changes in product mix; fluctuations in manufacturing yields; the ability to continue to grow and maintain an intellectual property portfolio and obtain needed licenses from third parties; the ability to attract and retain qualified personnel; labor relations of the company, its customers and suppliers; economic, social and political conditions in the countries in which Skyworks, its customers or its suppliers operate, including security and health risks, possible disruptions in transportation networks and fluctuations in foreign currency exchange rates; and the uncertainties of litigation, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the company's filings with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
